Application for [Role title] [Reference number]

Dear **[Mr or Ms Surname / Hiring Team]**,

[One line on the work you enjoy most], which is why the **[Role title]** role at **[Company]** stood out to me. I study **[Course]** at **[University]**, with an average of **[your average]** so far. **[Why this company, e.g. a product you admire]** is where I want to grow.

Lead with your strongest project for this role, written as what you did: I built **[Project]**, a **[one-line description]**, using **[tools the advert asks for]**. Give one or two results someone can check, such as **[a result, e.g. 30% faster]**, and link them to what the role needs.

Then summarise two or three other relevant projects in a sentence each, with a link to each one, and name the modules that back them up: **[Module one]**; **[Module two]**; **[Module three]**.

Show how you work: **[a role with responsibility]** taught me to **[a skill the team values]**, and **[another role]** taught me to **[another skill]**.

I would welcome the chance to bring this experience to **[Company]** and to learn from your **[team, e.g. engineering]** team. Thank you for considering my application; I would be glad to discuss it further. My work is at yourwebsite.com.

[Yours sincerely / Yours faithfully]
